

Bungee Run Risk Assessment

<i>Hazard</i>	<i>Existing Control Measures</i>	<i>Harm (1-5)</i>	<i>Likely (1-5)</i>	<i>Risk (1-5)</i>	<i>Further Controls to Reduce Risk</i>
Over enthusiastic participants	Responsible person supervising at all times. This unit is only operated by trained staff from the company.	2	1	1	In the event of large numbers of participants 2 trained operators will be supplied with the inflatable to aid with large numbers and one to one supervision on each lane.
Jumping off unit	Responsible person supervising at all times. This unit is only operated by trained staff from the company. Safety mats around entry/exit to the unit.	1	1	1	In the event of large numbers participants are controlled on and off of the inflatable in timed groups.
Larger participants colliding with smaller participants	Responsible person supervising at all times. This unit is only operated by trained staff from the company. This piece of equipment has 2 lanes divided by a wall. A maximum of 2 participants plus operators will be on the unit at any time.	1	1	1	Participants put in to groups of similar size.
Tripping over anchorage points, spare equipment, electrical cables	Anchor points used as per manufacturers instructions and spare equipment erected safely or stowed away. Where possible electrical cable does not cross any public pathway.	1	1	1	In the event of large numbers of participants attending or large events, additional safety fencing is erected, electrical cables will be erected

					overhead or covered and suitably marked.
Petrol Blower, Generator Risk of fire	Safety fencing erected around blower/generator. Blowers/generators filled with fuel before delivery Suitable fire extinguisher supplied, units are fire retardant, electrical equipment is PAT tested	3	1	1	All spare fuel is stored in suitable marked container, and in a safe location, units switched off during re fuelling,
Tripping on bungee cords.	Participants are made aware of the cords and are told when to run by a trained operator.	2	2	1	In the event of large numbers of participants 2 trained operators will be supplied with the inflatable to aid with large numbers and one to one supervision on each lane.
Bungee cords breaking or becoming unattached from anchor points or belts.	Responsible person supervising at all times. This unit is only operated by trained staff from the company. All anchor points a checked at regular intervals and are safety tested every 12 months. Only screw gate karabiners are used.	2	1	1	Spare karabiners are kept with or near the equipment in case of the need to replace any.
Risks of entanglement from cords and of clothing on return pull back.	Responsible person supervising at all times. This unit is only operated by trained staff from the company. Staff ensure all loose clothing is removed or tucked in and no	2	1	1	In the event of large numbers of participants 2 trained operators will be supplied with the inflatable to aid with large numbers and

	jewellery is worn on the inflatable.				one to one supervision on each lane.
--	--------------------------------------	--	--	--	--------------------------------------

The above information is based on manufacturer's criteria and experience from extensive use of the equipment.

Any notes, New risks:

Are all risks acceptable: (please circle)				Yes	No
